International Webinar on "COVID-19 Pandemic- Impact on Sustainable Fishery Sector and Global Trade (CPISFSG-2020)"

PREAMBLE

Fish and fish products that are highly dependent on international trade suffered quite early in the development of the pandemic from the restrictions and disruption in both domestic and international supply chains and closures of global markets. Further, measures to contain the spread of COVID-19 and the lockdowns implemented by some countries have resulted in logistical difficulties in seafood trade, particularly in relation to transportation and border restrictions. Some shortages of seeds, feeds and related aquaculture items (e.g. vaccines) have also been reported, due to restrictions on transportation and travel of personnel, with particular impacts on the aquaculture industry. Further, as a result of the drop in demand, and resulting price drops, capture fishery production in some countries has been brought to a halt or significantly reduced, which may positively influence wild fish stocks in the short term. In aquaculture, there is growing evidence that unsold produce will result in an increase of live fish stocks, and therefore higher costs for feeding as well as greater risk of fish mortalities. There are still many uncertainties ahead, particularly with regard to the duration and severity of the pandemic, but a prolonged market downturn is likely to introduce long-term transformations to the sector mainly affecting its sustainability. With this background the Dept. of Marine Biology of Vikrama Simhapuri University, Nellore, A.P., India is proposed to organize an International Webinar to looming out the impact of Covid-19 Pandemic on the Aqua and Fishery sector, its sustainability fate and Global trade supply chains.

Target Participants: The webinar target participants involves Students, research scholars, faculty members, professionals from Aqua and relevant industries.

Brief Report on the Webinar

About the University and the Department

Vikrama Simhapuri University (VSU) is a state university in the Nellore district of Andhra Pradesh, India. It was established in 2008 and presently, is offering twenty one Post Graduate Courses and two PG Diploma Courses along with Research Program (PhD). The courses are designed keeping in view the scope for development and the resources available in the region. The university is situated in an ambience of great cultural awakening, fascinating journeys of the mind, and rapid economic development. In the globalized context of the development of the district with its beacons of modernity like the Satish Dhawan Space Centre (SHAR), the launch centre for the Indian Space Research Organization (ISRO), Krishna patnam Port, one of the India's largest and fastest growing world-class sea ports of marine trade in the world market, Aquaculture and Fishing Industry, Fishing Harbours, and SEZs (Special Economic Zone), etc., The University is tuned to help knowledge dissemination and skill development in frontier area to enable the empowerment of the youth.

The importance of Marine Biology to the region having a vast coast line extending 169 Kms has been duly taken note of and the course is designed as well such that the students receive extensive exposure and invaluable training in the conservation and management of the Bay of Bengal and Pulicot Lake ecosystems through intensive field work in marine and coastal waters. Nellore is famous for quality of rice production and aquaculture. Nellore district is called the "Shrimp Capital of India" due to its high production of cultured shrimp. Meanwhile, India with its longest coastline (7000 km) and the largest archipelagic country in the world holds the potential of marine resources. Taking such things as an advantage the Marine Biology course at Vikrama Simhapuri University focuses on four main areas of development: Marine Biodiversity, Coastal Aquaculture, Marine Biotechnology and Sustainable Fishery Resources.

PREAMBLE

Fish and fish products (both Shellfish and Fin fish) are among the most traded food products in the world, with 38 percent of fish/seafood entering international trade. At the same time, fishing and fish/ Shrimp farming are important at local level for the livelihoods of many fish-dependent communities, as well as for low-income countries.

Fish and fish products that are highly dependent on international trade suffered quite early in the development of the pandemic from the restrictions and disruption in both domestic and international supply chains and closures of global markets. Further, measures to contain the spread of COVID-19 and the lockdowns implemented by some countries have resulted in logistical difficulties in seafood trade, particularly in relation to transportation and border restrictions.

Some shortages of seeds, feeds and related aquaculture items (e.g. vaccines) have also been reported, due to restrictions on transportation and travel of personnel, with particular impacts on the aquaculture industry. Further, as a result of the drop in demand, and resulting price drops, capture fishery production in some countries has been brought to a halt or significantly reduced, which may positively influence wild fish stocks in the short term. evidence that unsold produce will result in an increase of live fish stocks, and therefore higher costs for feeding as well as greater risk of fish mortalities. There are still many uncertainties ahead, particularly with regard to the duration and severity of the pandemic, but a prolonged market downturn is likely to introduce long-term transformations to the sector mainly affecting its sustainability.

With this background the Dept. of Marine Biology of Vikrama Simhapuri University, Nellore, A.P., India is proposed to organize an International Webinar to looming out the impact of Covid-19 Pandemic on the Aqua and Fishery sector, its sustainability fate and Global trade supply chains. It involves multiple stakeholders in an exploration and engaging in a creative conversation on this needy topic.

Overall received 2068 registrations from all the states of India and across the globe involving students, research scholars, Faculty members from different colleges and Universities, Aqua professionals, Experts from Aqua and relevant Industries, Scientists from National and International Research Institutions. On the day of the Webinar 733 participants representing 12 different countries (India, Australia, Bangladesh, Ethiopia, Kuwait, Malaysia, Myanmar, Nigeria, Singapore, Srilanka, U.K. and USA) were participated on Zoom online platform and You tube Live streaming and submitted the feedback.

As scheduled previously the International Webinar has been organised on 17.08.2020 as follows. Joining of the participants in to the webinar platform using the link was allowed from 9.30 am onwards. The inaugural session was started by welcoming the guests, resource persons, distinguished speakers, panelists and participants by Dr Ch. Vijaya, Organizing Secretary

CPISFG-2020 who also stated the brief objectives as well. Webinar was presided over by Prof. R. Sudarsana Rao, Honb'e Vice-Chancellor, VSU in his opening remarks highlighted the Importance of fishery sector in A.P. with a vast coast line in particular Nellore District and mentioned the economic impact on livelihood of people who are either directly or indirectly associated with this industry. During inaugural address, Prof K. Hemachandra Reddy, Chairman, Andhra Pradesh State Council of Higher Education, Chief Guest of the event stressed the need of the hour and stated the various measures taken by Govt. of A.P. to contain the impact of Covid-19 on Fishery sector and various incentives and measures of the Government to sustain this important and lucrative sector in Andhra Pradesh. He also mentioned that measures to contain the spread of COVID-19 and the lockdowns implemented by some countries have resulted in logistical difficulties in seafood trade, particularly in relation to transportation and border restrictions. Prof. M. Chandraiah, Rector of the University, in his inputs pointed out the importance of the title in the contemporary scenario. Dr L. Vijaya Krishna Reddy, Registrar, Vikrama Simhapuri University highlighted the challenges posed by the Pandemic on this important sector and the need for the transition as the need of the hour.

Founder and Director of Association of International Seafood Professionals Prof. Roy Palmer from Melbourne, Australia in his key note address on "Opportunities created by pandemic for Indian seafood industry-time for action and change" mentioned the importance of sea food in people's daily life, for their nutrition and health and also for economy. Being a senior consultant for World Bank and FAO project for US \$ 20million on Developing a Strategy for Seafood Consumption, he motivated

the people of different countries towards their increase in seafood consumption, almost an increase of over 4kgs per person per annum is to be achieved.

Another speaker Dr Arul Victor Suresh, Managing Director United Research Pte. Ltd. Singapore and President of the Society of Aquaculture Professionals who has put in 24 years of experience as Aqua Feed industry expert in Presentation on "Post Covid Development of Aquaculture in India" he suggested the post Covid fish forming strategies as diversification of the species and processing of fish to be more consumer friendly with choice in feeds to go for Intensification.

Dr Inayathullah, an overseas consultant and Project Manager, Island Prawn Company, Jeddah, from Saudi Arabia has focused on the issue "Recent Aquaculture technologies and Employment opportunities in India and Abroad". He stated the skilled Indian People are on leading positions in overseas in this Fishery and Aqua sector.

In addition Dr. A. V. Ramana Reddy, Former Head , Analytical Chemistry Division and Present CEO, Gemmological Institute of India as a panelist for the sessions pointed out the misbelieves in consumption of sea foods and also highlighted their importance. Another expert panelist Prof. P Haribabu, Associate, Dean, College of Fishery Science, Muthukur stressed the need for the sustainability in this sector and measures to be taken for sustenance of this ever expanding and demanding sector.

This was followed by feedback from the participants and distribution of participation certificates. All the participants were satisfied about technical sessions, interactive sessions and technical aspects. The session ended with closing remarks and Vote of thanks by the Organizing Secretary, Dr Ch. Vijaya. The proceedings of the Webinar was conducted in fair and smooth manner by the Principal of University College Prof. Suja S Nair. Technical aspects from Registrations. Zoom Login details, U tube live streaming, Feedback links were taken care by Dr M. Ussanaiah, Head Dept. of Computer Science.

Hope that, during the webinar besides exchanging ideas among peers, various issues pertaining to theme particularly on Sea food industry, challenges posed by Covid-19 pandemic and opportunities created and Aqua Industry and its sustainability fate and the way forward were discussed. Young academicians, Research scholars, students, faculty, Aqua Professionals and Industry experts had an opportunity to improve awareness about various issues discussed for their long career.
